

Como instalar o MongoDB no Windows

Acesse o site oficial: <https://www.mongodb.com/try/download/community>

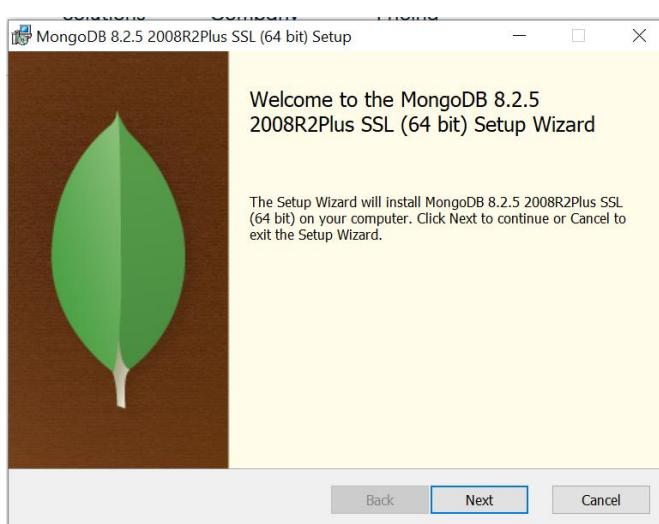

Escolha:

- **Version:** última versão estável
- **OS:** Windows
- **Package:** MSI

Clique em **Download**

The screenshot shows the MongoDB download page. On the left, there's a sidebar with options like MongoDB Atlas, MongoDB Enterprise Advanced, MongoDB Community Edition, MongoDB Community Server, MongoDB Controllers for Kubernetes Operator, and MongoDB Search in Community. The main area is titled "Or, to install the Community version locally:" and contains three dropdown menus: "Version" set to "8.2.5 (current)", "Platform" set to "Windows x64", and "Package" set to "msi". Below these is a "Download" button, a "Copy link" button, and a "More Options" button. A URL at the bottom of the page is https://fastdl.mongodb.org/windows/mongodb-windows-x86_64-8.2.5-signed.msi.

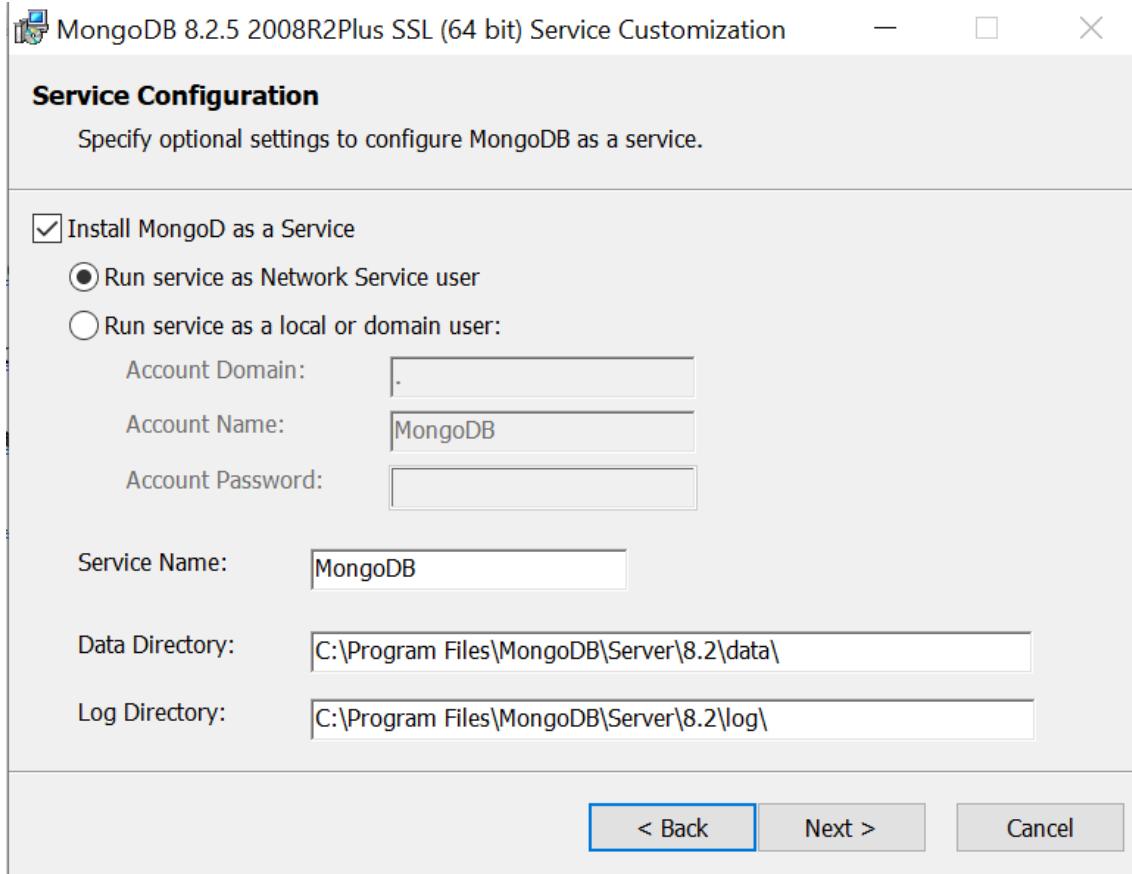

Abra o arquivo .msi baixado

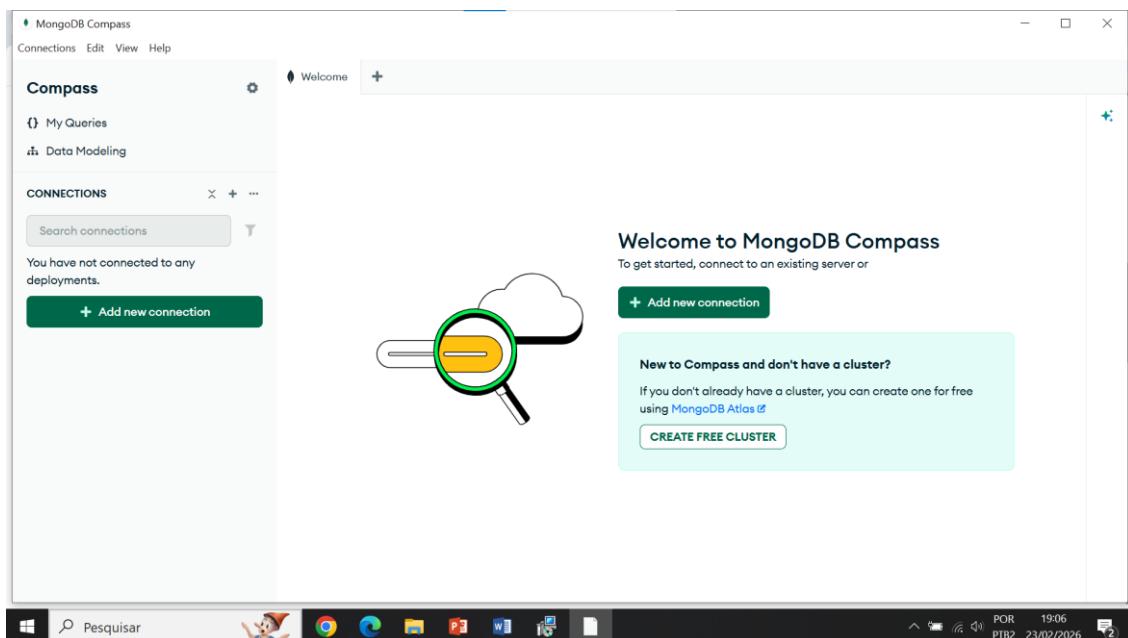

Clique em **Next**

Aceite os termos (I accept...)

- Escolha **Complete**
- Marque a opção **Install MongoDB as a Service**

- Clique em **Next → Install**

Pronto!!!
